DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/1/2006 has been entered.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1,2,5-8,10,12 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by WIPO '165.

WIPO '165 shows the claimed invention, including a pair of symmetrically arranged ballasted keel elements affixed to the bottom of a fixed keel element 7.

4. Claims 1,2,10 and 11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Page.

Page shows the claimed invention, including a pair of ballasted keels symmetrically arranged and pivoted upon two parallel axes from the bottom of a fixed keel part 24. Page specifically mentions the concentration of ballast at the outer ends of the movable parts.

5. Applicant's arguments filed 3/1/2006 have been fully considered but they are not persuasive.

Applicant argues that WIPO '165 discloses element **7** is a connection of the pivot axis **6**, and therefore it is not a fixed portion of the keel.

The examiner fails to understand this argument, and why **7** is not "fixed". Element **7** carries the pivot **6** for the swingable lee boards, and is itself fixed to the bottom of the hull. Since element **7** does not move in relation to the hull, it is itself fixed, and is a "fixed portion" with an "end" as claimed. The upper end of **7** is connected to the hull, and therefore such depicts a "connection end" as claimed.

Applicant's argument re Page are essentially the same as that of WIPO '165. Applicant does not recognize the projecting keel portion **24** of Page as a fixed keel part, however, that is exactly what it is. It is inherently connected to the hull proper at its upper end, and meets the claim language.
